

SteraMist™ Surface Unit

Description

The **SteraMist™ Surface Unit** is a fully portable, hand-held, point and spray disinfection/decontamination system. Application time of only five seconds per square foot and a seven-minute contact time to disinfect/decontaminate. The **SteraMist™ Surface Unit** disinfects/decontaminates high touch surfaces.

Benefits

- Kills bacteria and inactivates viruses reducing the risk of potential exposure in a treated space.
- Easily incorporated into your daily cleaning protocols, perfect for frequent use in entry and exit points.
- Allows immediate disinfection/decontamination in the case of accidental spills.
- Mobile for rapid deployment throughout a facility, lightweight, easy to transport, and capable of achieving reliable disinfection/decontamination.
- Silver, Chlorine, and Peracetic Acid free formula maximizes material compatibility on rubber, metals, and other surfaces.

Feature	HHA-101
Voltage	110 V AC, 5A
Disinfection/Decon Technology	Ionized Hydrogen Peroxide (iHP™)
Number of iHP™ spray ports	1
Dimensions	0.64 m Length x 0.56 m Width x 0.38 m Depth (approximately 25" x 22" x 15")
Weight	Approximately 22 kg (~48 lbs.) Applicator approximately 8lbs
Particle Size	0.5-3 Microns
Broad Spectrum Kill	Yes
Safe for Sensitive Equipment	Yes
Flow Rate	50 ml per minute
Treatment Method	1 ml per ft. ²
1 ml per ft. ²	5 seconds over a 1 ft ² treatment area
Contact Time	7 minutes
Warranty (parts & labor)	12 months
